ABOUT ME

I am a systems engineer passionate about programming, with a strong command of languages and frameworks such as React, JavaScript, HTML, CSS, Bootstrap, Java, Go, PHP, and SQL. These skills enable me to create robust applications, including CRUD systems. My hands-on experience and certifications have refined my ability to design responsive and user-centered interfaces, always striving to deliver high-quality software solutions that drive technological innovation.

WORK EXPERIENCE

- AUDIFARMA S.A**
Intern, Pereira, Colombia

JUN - 2022

DEC - 2022

 - Development of Bash scripts and automation of GlassFish servers focused on Java EE, optimizing operational efficiency.
 - Troubleshooting network issues on workstations, ensuring connectivity and performance.
 - Effective management of administration portals such as FortiClient and Aruba, ensuring security and control of the infrastructure.
 - Creation of web CRUD applications using HTML, CSS, JavaScript, and PHP, enhancing user experience and application functionality.

RESEARCH GROUP

- PROGRAMMER IN THE OBELIX RESEARCH SEEDBED, UNIVERSIDAD LIBRE**
Pereira

JUL - 2023

JUL - 2024

 - I participated in the development of a graduate management and control system, integrating frontend and backend technologies under the MVC pattern.
 - I contributed to the construction of prototypes and the implementation of key features, including the management of graduates, degrees, and observations.
 - I also took part in the design and optimization of the database, ensuring proper data persistence and retrieval.
